

# The Weekly AI Check-In

Build the habit. 10 minutes a week.

# The Weekly AI Check-In

A one-page checklist for a weekly habit - what you tried with AI this week, what worked, what to try next.

---

## Why a Weekly Habit

AI skills do not come from reading about AI. They come from trying things, noticing what works, and adjusting. A 10-minute weekly review builds the habit loop that makes the difference between someone who uses AI sometimes and someone who thinks with it.

## Part 1: What I Tried This Week

List up to 3 things you used AI for this week:

1. Tool: \_\_\_\_\_ Task: \_\_\_\_\_

2. Tool: \_\_\_\_\_ Task: \_\_\_\_\_

3. Tool: \_\_\_\_\_ Task: \_\_\_\_\_

## Part 2: Honest Assessment

For each thing you tried:

- Did it save time? (Yes / No / Unclear)
- Was the output useful without heavy editing? (Yes / No / Partial)
- Did it help you understand something better? (Yes / No / N/A)
- Would you use this approach again? (Yes / No / Maybe with changes)

## Part 3: What I Noticed

One thing AI did surprisingly well this week:

---

One thing AI got wrong or that surprised me:

---

One moment where I chose not to trust the AI output:

---

## Part 4: Next Week's Experiment

Pick ONE specific new thing to try with AI next week:

### >> MY EXPERIMENT

I will try using AI to: \_\_\_\_\_ I will know it worked if:  
\_\_\_\_\_ I will do this on [day]: \_\_\_\_\_ at [time]:  
\_\_\_\_\_

---

## Part 5: Skill Snapshot

Rate yourself this week (1 = just starting, 5 = felt natural):

- Writing specific, detailed prompts 1 2 3 4 5
- Following up when the first answer is not enough 1 2 3 4 5
- Verifying AI output before using it 1 2 3 4 5
- Knowing when NOT to use AI 1 2 3 4 5
- Combining AI with my own judgment 1 2 3 4 5

Print this out. Fill it in by hand. Keep a stack. In a month, look back at where you started.
